

Corporate Brain

Know your team. Move faster.

Corporate Brain brings psychometrics, technical assessments and project management into one view of how a team really works.

Brand idea & voice

Three circles, one overlap. People, skills and work meet where it matters.

Three things overlap. That is where teams get efficient.

- **Psychometrics**
  How people think, decide and work together.
- **Technical assessments**
  What skills a person brings to the work.
- **Project management**
  Where that work is planned and delivered.
- **Efficiency · the overlap**
  Where all three meet.

Usage

Keep the mark whole and let it breathe. These are the grounds that work, and the changes that do not.

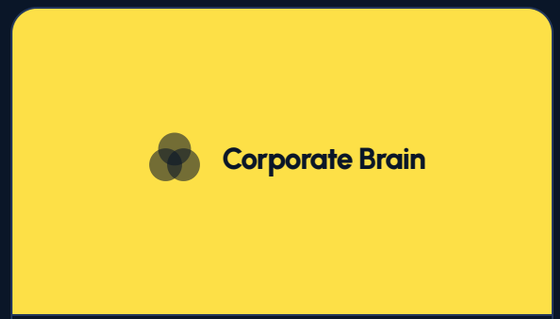

DO · APPROVED GROUNDS

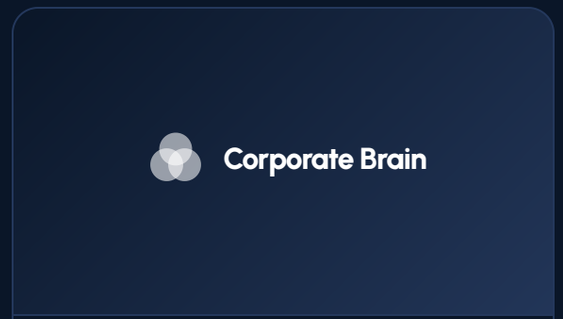

✓ Primary ground

✓ Reverse ground

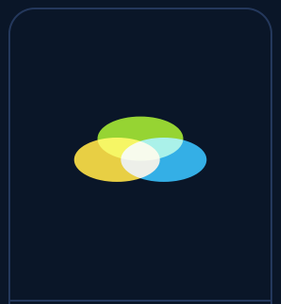

✓ Brand color · one color

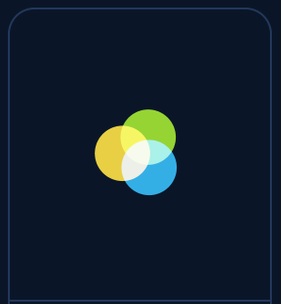

✓ Image or gradient · white

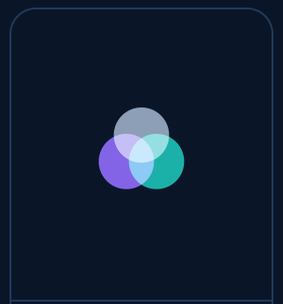

DON'T

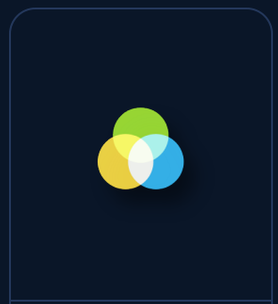

✕ Stretch or squash

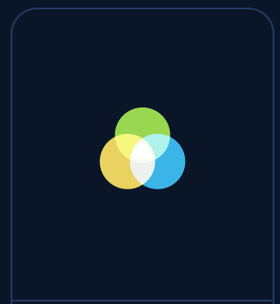

✕ Rotate

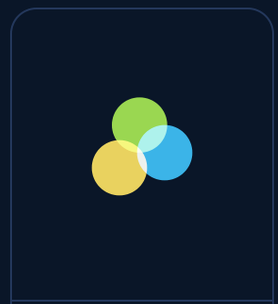

✕ Recolor off-brand

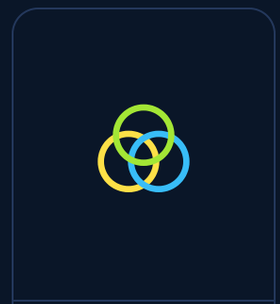

✕ Add shadows or glow

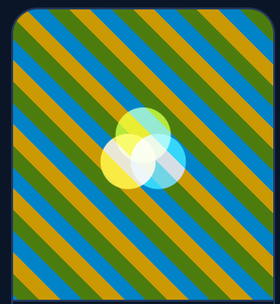

✕ Add a center shape

✕ Rearrange circles

✕ Outline only

✕ Busy background

Blend modes are part of the mark. On a flat ground the circles overlap into new colors, so always use the supplied artwork instead of rebuilding it.
Keep one color or white versions for photos, stamps and embossing.

Digital applications
