None of your scores crossed a modifier threshold, so the archetype guidance applies as it is.

HOW TO USE THIS

Treat it as the start of a conversation, not a label: ask yourself whether it sounds right, and correct it where it doesn't. Working styles change, so it's worth retaking in 3 to 6 months. This is a 20-statement self-report, not a clinical assessment, and it should never be the only input for a hiring, promotion or other decision.
